

Adopt a Class

ISAAC NEWTON ACADEMY
JUAREZ MEXICO

Individuals or groups who “Adopt a Class” for the school year can choose which class they would like to support. Their contribution will go towards the cost of educating one student or class which covers a portion of the teacher and assistant salaries, classroom supplies, utilities, curriculum updates, cleaning, copying fees, electricity, and class parties (Valentines, Christmas, Children’s Day, and monthly Birthday celebrations) among other expenses. One of the benefits of this relationship is being in communication with the students during the year. You are welcome to send pictures and letters to your class. Individual members or the entire class will send you updates on what they are doing during the school year and pictures of their various activities.

Relevance: We are privileged to provide an excellent education to many children who would quite possibly not be in school, or be one of fifty students in a classroom in the public schools, disappearing into the crowd or standing out in a negative way. At Isaac Newton Academy the small class sizes provide students with a safe environment so that they can explore and discover their unique talents, structure which teaches them knowledge and discipline, and life skills that give them a practical advantage over their peers. It is essential that we continue to provide these educational opportunities for the future of our amazing children.

All Isaac Newton Academy students receive partial to complete scholarships, making their quality education affordable. As compared to many other Christian schools, our operating costs for educating one student is minimal at only \$1,100 per year. All of our students are charged an annual tuition of \$200 and receive 80% to 100% tuition break depending on their individual situation. Approximately ten percent of the student population is from the Child Protective Services of Mexico (DIF) and receive a 100% FREE education.

Objective: Our desire is that each classroom be adopted each year. Each classroom that is adopted on a yearly basis enables us to continue providing this excellent education at an affordable rate for our students. Through the “adoption” students will learn to more deeply value their education as they are in relationship with individuals who believe in their future. Each class size will determine how many adoptions are necessary (for example: a classroom of 15 students will need 15 adoptions at \$1,100 each).

Results: Approximately fifteen to twenty students will directly benefit from your adoption. Your support enables the teachers to passionately impart their wisdom and the staff to focus on pursuing excellence in daily decisions affecting one hundred fifty individuals.
